

OU APPELE PROGRESS.

Thursday, June 10, 1897.

THE NEWS OF THE DAY.

A FEW BRIEF PARAGRAPHS FOR BUSY PEOPLE.

The Flotsam and Jetsam of the World
Around us Portrayed in Condensed Items, Which Treat of Men and Things in a General Way.

Numerous icebergs are reported off the banks of Newfoundland.

The Dominion parliament voted \$11,000 for new wharves at Lake Winnipeg.

The assessment commissioner places the population of Winnipeg at 28,491.

Great preparations are being made in Fort William for the mid-summer celebration.

The United States senate voted \$50,000 to relieve United States citizens in Cuba.

The British government have arranged with Hawaii for the landing of the Pacific cable.

The imperial government will grant an annual subsidy of \$50,000 to the Atlantic fast line.

Stringent regulations governing the importation of dogs to Great Britain will be put in force.

The Lord's Day Alliance of Kingston, Ont., will test the legality of running Sunday cars in that city.

The Dominion parliament voted \$2,000 for expenses of the Canadian military contingent to the Queen's jubilee.

The Winnipeg city council has voted an appropriation of \$1,000 towards the celebration of the Queen's diamond jubilee.

The Ontario government is constructing a wagon road between Wabigoon and Manitowish lakes. It will be ready for traffic by the 1st of July.

A traveling evangelist in the western states has an assistant stationed outside his meeting places, and every time he brings down a fresh sinners he signals to this man, who sends up a skyrocket.

The Dominion government has raised the cost for incorporating companies. Hereafter companies with stock of a million will pay \$500 fee; half a million, \$300; two hundred thousand, \$250; one hundred thousand, \$200; fifty thousand, \$100.

In connection with the Queen's diamond jubilee it is proposed to have all the nineteen ancient houses of Cumberland and Westmoreland lit up. A signal light of beacons, it is suggested, might be arranged for from Land's End to John o' Groats.

The discovery of one of the largest coal fields in the world is reported to the state department at Washington, D. C., by United States consul at Carthagena, Colombia. The fields are in the department of Bolivar in Colombia, eight to twelve miles from the bay of Cispoti, and forty-eight miles from Carthagena. The coal is semi-anthracite and anthracite. The field contains about 200,000,000 tons and comprises 215,000 acres.

At a recent meeting of the police commissioners of Toronto it was decided to adopt the "Berlitz" system of measurement of criminals which means that instead of taking a prisoner's photograph they take his measurement by the finger and ear. A representative of the force will be sent to Chicago to learn the system and the necessary apparatus will be procured. The Toronto police department will become a member of the Chicago Central Bureau of Identification.

A Remarkable Razor.

A peculiar razor is in the possession of R. E. Abel, an 84-year-old resident of Arcadia, Neb. The razor was the property of Mr. Abel's grandfather, who was a revolutionary soldier, but how long the razor was in his possession is not known.

The present owner has shaved with it for the last sixty-two years. It has a handle which the present owner made from the spikes of a deer's horn in 1835. The blade is bearded "silver steel." It is apparently of Swiss make, though no mark other than the one mentioned can be discovered. At times the old gentleman uses it twice a week for as long as two years without having it sharpened and yet it is never forced to place the edge to a stone. The metal will not tarnish and though in constant use for more than a century, the razor does not appear to have been worn down much. Mr. Abel says that it has not worn a particle since he received it as a young man.

Irish Setter by a Dog.

An Irish setter dog belonging to a chicken fancier of Trenton, N. J., has just hatched out a brood of six Plymouth Rock chickens and appears to be in the line of the dog. The dog looks two of his legs while visiting the chicken "branch" of its owner about three weeks ago, and the injured birds were placed in splints and the dog laid in a box of straw to recover. The owner, a few days after the accident, conceived the idea of placing the dog's legs under the great affection for the would hatch. He selected six Plymouth Rock eggs and stored them away among the straw, where they were kept warm by the invalid dog. Results were impatiently watched for, and Sunday they came in the shape of six healthy, chirping chickens. As strange as it may appear, the dog shows the greatest affection for the chickens and guards them as jealously as she would watch her puppies.

Sparrows Perfectly Preserved.

Some petrified sparrows were found at Anderson, Ind. the other day by workmen who were tearing down the furnace of a works formerly operated there. The heat from these furnaces overrode sparrows who try to fly across the great chimneys, and hundreds of the birds fell into the furnaces every week while the fires were kept up. When the workmen were clearing the furnaces they came across four birds in a perfect state of preservation, the color, feathers and eyes resembling exactly those of the live birds. When touched they were found to be perfectly carbonized, and were as hard as flint. Even the tips of the feathers were perfectly tempered. The chemical conditions which brought this about are a mystery. It is thought that a small vacuum was formed in the furnace and that they fell into this and were exposed to the intense heat. They had evidently been there for months.

A Narrow Escape.

The train on the Columbia and Kootenay railway left the track nine miles west of Nelson, B. C., and narrowly escaped going over the precipice. Only two passengers who jumped were injured.

A CARRIER PIGEON SERVICE.

The New System of Communication Between the Hawaiian Islands.

A carrier pigeon service on a large scale is about to be established on the Hawaiian islands. A pigeon flying is generally carried on a postman, and is the national sport of Belgium, but a company has just been formed in Honolulu to utilize the peculiar traits of the homing pigeons in a business which is set forth in a prospectus as being very remunerative.

Birds have already been bought and taken to the islands.

The proposition is to establish lots on all of the different islands in the Hawaiian group, beginning first with Hawaii, Maui, Kauai and Oahu. By means of fast flying pigeons messages can be sent from Honolulu to all the towns and plantations on the different islands and vice versa. It is believed that not less than fifty plantations will contribute to the scheme.

Commissioner Joseph Maiden of Honolulu, who is at the head of the new company, has mailed maps of the islands to the best posted homing pigeon men in the country, and they have replied that the distance between the islands or the channel winds will be an obstacle in the successful flights. Kani and Maui are 100 but 100 miles from Honolulu, and the most distant point of the islands from Honolulu is but 250 miles. The best record shows that pigeons have flown 100 miles in one day, in a fly from Philadelphia, Pa., to Philadelphia. This could not be done regularly, but it is generally considered a feasible plan to fly pigeons over moderate sized bodies of water at a very fast rate.

The need of more frequent and speedy transmission of messages between the islands of the Hawaiian group has been strongly felt, and as their seems to be little or no prospect of an inter-island cable for some years at least the proposition to establish a homing pigeon service is deemed a good business scheme. The company being organized is to begin with a capital of \$10,000 divided into 100 shares of \$100 each. It is proposed to begin with a lot of 100 young birds of pedigree stock and half a dozen older birds with established reputations. It is expected that within a year birds will be raised all over the islands and the service will be in full blast. Commissioner Marsden has bought already nine pairs of first-class homers from H. F. Whitman, of Alameda, secretary of the Pacific coast Pigeon and Homing society. Four pairs went down to Honolulu on the steamer Australia on the last trip and five pairs followed on a schooner. These birds will be sent to the different islands for the purpose of raising young birds as quickly as possible.

The Inter-island Steamship Company will carry the birds to and fro between the islands from their lots, so that they can be flown back with messages.

A very similar scheme to that of the Hawaiians is also being established between Alaska and Puget Sound.

LUCKY FISHERMEN.

Lost in a Fog, but Manage to Find Their Way to Port.

Sixteen members of the Provincetown fishing schooner, J. P. Johnson, who went astray on the western bank last week, have arrived at Provincetown, Mass., all well, although they suffered much from hunger. The men report that they were unable to judge the location of their vessel after they had been out traveling a short time, but by blowing fog horns continuously, the dories all were gathered together, and tied one behind the other. They remained in this position until daylight, when the dense fog lifted, and it was decided to attempt to row to La Have, Nova Scotia, the nearest port. Two dories were abandoned before reaching in that direction, the occupants being distributed in the other boats. The small quantity of hard tack in the dories was soon exhausted, and the men were compelled to eat raw fish. No vessel was sighted until the castaways were within twenty-five miles of the Nova Scotia coast. The schooner J. P. Johnson, Jr., passed near the bank. She was signalled and as she was bound for Boston, the Johnsons' crew asked to be taken on board. The Merritts' captain consented, and when off Race Point, the men got into their dories and rowed nine miles to port.

Fatal Boiler Explosion.

At six o'clock the other morning, as the steam lumber mill at Caswell's, situated about a mile east of Bangor, Me., was starting, one of the boilers exploded, killing four men. They were F. W. Gushes, engineer of Bangor, Vt.; Ernest Nichols, of Bangor, Vt.; Fred Bond, of Fredrick, Me.; and King, laborer, of Bangor, Me. The foreman, Stephen Nichols, was severely injured, probably fatally. All the bodies were horribly mutilated. One of the boilers was blown clear through the mill roof. The other boiler was blown into the mill yard, and the mill was badly wrecked. The cause of the explosion is not known and the damage cannot be accurately estimated. It will fall heavily on the owners, as it is now their busy season, and a stock of four million feet of logs in the water and about four million feet of sawn lumber in the yard were awaiting to be dressed in the mill. The mill was insured, but for how much cannot be ascertained. The Lowelltown Lumber company owned the property. All the men who were killed were single, except Nichols, who leaves a wife and two children.

Colored People Poisoned.

Northern swindlers, in their efforts to get money without earning it, are responsible for the poisoning of many colored people in the vicinity of Norcross, Ga. They advertised a lot of medicine was guaranteed to make colored people turn white. One very black young woman sent for some of the stuff and applied it according to the directions in the bottle, rubbing it vigorously into her skin. The operation caused intense suffering, because the lotion was as hot as cayenne pepper, but the woman was so possessed in time her skin changed color as the advertisement said it would, but it turned red instead of white. Ugly scabs broke out on her face and body and her hair came out. She appealed at last to a physician who found unmistakable evidences of poisoning. The woman is now critically ill, and if she gets well will be disfigured for life. Her case sounded an alarm among the negroes and nearly a score of others suffering from the same trouble are terribly scared.

Ontario Crops.

Reports received in Toronto from different sections of Ontario, east, west, north and south, are all unanimous in speaking of the splendid condition of the crops. The fall wheat has seldom looked better than it does now, and if the progress already made is continued uninterrupted until the close of the harvest, Ontario should have one of the biggest crops in the history of the province. It is believed that there will be a large increase in the yield of spring wheat and in the general average of barley.

OUR WESTERN HERITAGE.

THE HAPPENINGS OF THE GREAT WEST BRIEFLY TOLD.

A Resume of the Events of the Week Told in Short and Interesting Items—Prominent People, Their Sayings and Doings.

The Fraser river, B. C., is swollen beyond all previous records.

The Northwest Territories will be granted a responsible executive and other reforms.

A man was waylaid and nearly killed six miles from Rossland, B. C., on the Northport road.

W. A. Fraser, of Toronto, will shortly resume the boring for oil at Athabasca Landing this season.

The six-year old son of Thomas Bailey, of Blenheim, Man., suddenly choked to death the other week.

A John Ford was drowned at Golden, B. C., a few days since, by being thrown from his horse into a slough.

All the journeymen plumbers in Vancouver have struck for higher wages. They were getting \$2 per day and now demand \$3.

A section man named Wolfe, whose home is said to be in Winnipeg, was drowned the other day while bathing in the reservoir at Tilley station on the C. P. R.

Cabel Daniels, of Rossland, B. C., shot a woman of that town three times, though not fatally, and then shot and killed himself. The cause was unrequited infatuation.

J. Laville, C. P. R. brakeman, employed on a work train at Kinross gravel pit, had his left hand badly smashed while at work a few days ago. He was taken to Medicine Hat hospital, where amputation of the fingers was found necessary.

Admiral Nelson, B. C., states that Bruno Marano, a wood contractor, was killed, and R. Ross, a C. P. R. employee, were injured, probably fatally, on the Columbia and Kootenay railway, 20 miles from Nelson. They were knocked off a flat car by a wood pile projecting over the track.

On June 1 the C. P. R., will materially increase its rail and lake service in the Kootenay country, so as to give a daily service to and from the main line to points south, and also will inaugurate a new route from Arrowhead to the Lardeau district, in which many new mines are being developed.

A son of Alexander Ross, of Boiesvain, met with a serious accident. A gun that he had taken out to the field had been left lying near a slough, and on reaching it placed it on the plow between the handle, muzzle up. In traveling up the arrowhead, the muzzle struck a stone, throwing young Ross and the plow up, the jerk causing the gun to go off. The charge tore away the upper part of Ross' left shoulder, barely escaping the artery.

UNCLE SAM'S DOMAINS.

Some Peculiar Incidents Respecting Our Neighbors Across the Border.

A Montana man has just been sent to prison for a year for some time. His name is John Bloor, and he was secretary of the state senate during the session just closed. A bill was passed in the last hours of the session cutting the numbers and salaries of county officers about one-third, but when the speaker of the house wanted to sign the measure it was not forthcoming. Search failed to reveal it, and the session closed without the bill becoming a law. Suspicion was directed toward Bloor, who was arrested charged with the theft of the bill, and his conviction and sentence to one year's imprisonment followed.

A novel industry has sprung up in a Pennsylvania town which is said to have been in existence for some time. It is nothing less than the raising of spiders in large numbers for the purpose of stocking wine cellars. The spiders are sold to wine merchants who let them loose in their cellars. The spiders spin their webs around the bottles of new wine, which, with a little judiciously applied, gives an exquisite appearance to the bottles and of extreme old age. Of course this has its effect on the prospective buyer, with the result that the merchant can sell the wine of recent vintage at the price of the real old thing.

Isaac Black, a farmer living in Indiana has been blind for years, but last week he passed through an experience which is attracting much attention in medical circles. The first of the week his eyes sockets and sightless orbs began to get sore. Thursday morning he opened his eyes to find that sight had fully returned. The joyous moment overcame him. He had prayed for years to be able to see his family and the surroundings of his home, and it seemed as though his prayers were answered. But gradually the next day the sight left him, and again he is in total darkness. Oculists can give him little or no hope of seeing again.

Ducks worth \$85 are not met with every day, and still more rarely are such valuable fowls sold for the insignificant sum of fifty-five cents. There was a case of this kind in New York city last week, however, and as a result two milliners, sisters, are a little richer than they were. Bertha and Josephine Kraus were hungry, and went to a meat market for the wherewithal to satisfy their appetites. They bought a nice looking duck for fifty-five cents, and took it home. While cleaning it they found a piece of glass in the fowl and threw it aside. After their feast was finished, they examined the glass more closely, and as it did not look like the common article, they took it to a friend who was in the jewelry business, who pronounced it a 3 1/2 carat diamond, very clear, but nevertheless worth \$85, which sum he gave them for it.

Manitoba Vermicelli.

Among the recently established manufacturing in Winnipeg that are working in a quiet unobtrusive way, but gradually securing a firm foothold, is a vermicelli and macaroni factory. The proprietor has been connected with some of the largest factories in France, Belgium and Italy, states that for vermicelli and macaroni Manitoba flour is the finest he has ever used. In the old country, it appears, the poorer qualities of flour are chiefly used for these goods. The proprietor of the Winnipeg factory intends to send an exhibit of his goods to the Brussels and Paris exhibitions to show what Manitoba can do in the line of past goods, and he says he will give the manufacturers there a surprise. The method of making vermicelli and macaroni is interesting. The paste is worked to the consistency of rubber and then pressed through a perforated die, which forms a round and hollow stick. After going through the press the sticks are cut into various lengths and deftly twisted into various shapes and then put away to dry out. The latter process making it ready for the market.

LIKE SUFFERERS ONLY KNOW.

R. Scriver, Carpenter, Hastings, was a Great Sufferer from Kidney Disease—South American Kidney Cure Effected a Quick Cure—It is a Specific Remedy for a Specific Disease—It Dissolves and Radiates All Solid Matter From the System. Is Safe and Permanent.

For many years I have been troubled with kidney disease, necessitating the taking of much in the way of remedies. Two years ago they became so bad that I had to seek the aid of a physician. My urine was more like blood than anything else, and was very painful. Just at that time I began using South American Kidney Cure. It gave me immediate relief, and from that time till now I have had no difficulty. I can safely and honestly recommend this great remedy to all persons suffering from kidney trouble.

In vain for bait, from morn till late, He digs when after sport he roves; But when he makes a garden patch The fishing worms emerge in droves!

CONVINCED THE SCEPTIC.

The Merits of the Great South American Kidney Cure Without All the Assaults of the Coldest and Hottest Remedies. When they are Converted to its Use in Their Personal Affairs They Become its Best Friends—For it Never Fails Them.

Mr. Dinwoodie, of Campbellford, Ont., says: "I recommend South American Kidney Cure to everybody. I consider it would be tantamount to the best interests of humanity were I not to do so. In one instance I convinced an avowed sceptic to all remedies, and it has been of great benefit to him that he continues to purchase and use it, and has proved its great worth as a stomach and nerve tonic. It has done wonders for me and I keep it constantly in my house. An occasional dose acts as a preventive and keeps me cheerful and well. It is a wonderful medicine."

"What an egotistical thing that turtle is," said the frog. "Yes," replied the beetle, "he's always wrapped up in himself."

AN INSURANCE MAN'S STORY.

J. J. Hanratty, Inspector for the Standard Life Assurance Co., at Peterborough, Cured of Multiple Rheumatism by the Great South American Kidney Cure—It Turned the Midnight of Suffering Into Midday Brightness of Good Health—These are his Words.

I was a great sufferer from muscular rheumatism in my arm; so much so that for days at a time I could not sleep. I walked the floor in pain the greater part of the night. I procured a bottle of South American Kidney Cure and found great relief after a few doses. It's a sure cure, and I heartily recommend it.

A New School Arrangement.

An interesting experiment is being made in a township in northern Ohio, which involves the abolition of the old district schools. Instead of having numerous small schools scattered over the country, one big schoolhouse has been built in the centre of the township, and every morning light covered rigs holding twenty-five persons each running through the township gathering up the pupils and taking them to school, and then at the close of the session, returning them to their homes. By the new arrangement, which works to perfection, there is a great saving in fuel and the wear and tear of several buildings, and the numbers of teachers necessary is reduced, and there is more interest in school affairs among the pupils. Another advantage of the scheme is, the children do not have to wade to school through the mud in wet weather and getting their feet wet, making the mother's services necessary. The plan is said to have resulted in a decrease of taxes.

Nothing Better.

Miss Emily Graig, Almonte, Ont., says: I have never found anything better than your Fowler's Extract of Wild Strawberry for pains in the stomach or diarrhoea. A few doses cured me of severe diarrhoea after other medicines had failed. We always keep it in the house and have every confidence in its virtues.

"But why do you think the human race is degenerating?" "Mainly because of the poetry that it is claimed posterity will admire, though we don't."

Two Bottles Cure Pimples.

GENTLEMEN.—For a long time I had pimples breaking out all over my face. I was told about B. B. B., and started its use. After taking one bottle I was much better, and the second bottle made a complete cure. I have recommended it to others of my friends, and they have found it uniformly satisfactory.

A. F. BEST, Whitehead, Ont.

Deacon Shy—I call you 'n foh aces! Mr. Shy—What you got? Deacon (talking of the pile)—I've got de kleptomani!

Bronchitis Cured.

MESSRS. T. MILBURN & CO., Toronto, Ont.

DEAR SIRS—I have used Hagyard's Yellow Oil for my children when they had bronchitis and always with great success. I use it also for sore throat, and find there is nothing equal to it as a sure cure.

MRS. JAMES O'BRIEN, Huntville, Ont.

The winter of our discontent has fitted; Now comes the season of the benefit; In which almost all concerns are benefited.

Except the actors who are needing it.

Rapid Heart Beat.

Mrs. Jas. Griest, Blenheim, Ont., says: "I was troubled with rapid beating of the heart and a strange sinking feeling. I took Milburn's Heart and Nerve Pills and they have cured me. The heart weakness and throbbing, together with the nervousness which it caused, have completely disappeared, and I am now strong and well."

She—I have been shut up in boarding school so long that I feel very awkward and timid in company. I do not know what to do with my hands. He—I'll hold them for you.

A Triumph Won.

"Before taking Dean's Kidney Pills I felt that I had had my grip upon me. Now I know that it has been met and defeated. I have used the pills for some time and now enjoy good health. I shall always be glad to testify to the merits of this triumphant medicine."

(Signed) RICHARD LYMAN, St. John, N. B.

A REMARKABLE CASE.

DOCTORS COULD NOT AGREE AS TO THE TROUBLE.

A New Brunswick Lady the Victim—Suffered For Thirty Years—The Attack Caused Partial Blindness and a Feeling of Semi-Paralysis.

Fr. in the Woodstock, N. S. Sentinel.

Mrs. E. P. Ross, of Riley Brook, N. B., says:—"I have been a sufferer for thirty years, and I am sure I would still be in the same lamentable condition had it not been for Dr. Williams' Pink Pills. I was married at the age of twenty and am now fifty-one years old. I had always enjoyed good health, until after my first child was born. About a month later the illness attacked me which has since made my life miserable. I consulted different doctors but they did not agree as to the nature of my trouble. One said it was a species of paralysis, others said symptoms of it. I would be feeling very well when I would suddenly have a sensation of partial blindness, and everything before me would become dark. Then my hand and arm would become numb, and after about ten minutes this sensation would pass to my lower limbs, then my tongue would become affected, as would also my hearing. Voices, no matter how close to me, would seem dim and far away. The symptoms would last for about forty minutes. I would have a violent pain over the eyes, which would continue for twelve hours or more. Notwithstanding all that was done for me, these spells were becoming more frequent, and at last I would have two attacks a day. I was also troubled with rheumatism which added to my misery. I could not sew, or knit or do any work that required close attention to it. All

this trouble had never left me for years, and at the age of 45 I consulted another doctor. The medicine he gave me, however, made me worse instead of better. Then I was advised to try Dr. Williams' Pink Pills. I was using the third box before I found any benefit, but then there was a decided change. By the time I used twelve boxes I felt as well as I did in my young days. Every symptom of the trouble that had so long made my life miserable for eighteen months had disappeared. For eighteen months I did not use the pills and was as well as ever I had been in my life. Then one morning I felt a slight attack of the old trouble and determined to try Dr. Williams' Pink Pills. I used a box and took an occasional pill and have never since had a symptom of the trouble. To say that Dr. Williams' Pink Pills have done wonders for me is putting it mildly, and I strongly urge their use on all who may be ill. Pink Pills were also of great benefit to a niece of mine, Miss Elsie J. Everett. Her mother died when she was quite young, and naturally much of the care of the household devolved upon her, and as she grew up she became weak, easily tired, subject to headaches and her complexion was pale and was like a young lady teacher who was boarding with the family, who had used Pink Pills with great success urged her to try them. The result was that she soon was enjoying the best of health and is a fine robust young lady who shows no traces of her former illness.

Dr. Williams' Pink Pills cure by going to the root of the disease. They renew and build up the blood, and strengthen the nerves, thus driving disease from the system. Avoid imitations by insisting that every box you purchase is enclosed in a wrapping bearing the full trade mark, Dr. Williams' Pink Pills for Pale People.

A Summer Specific.

Dr. Fowler's Extract of Wild Strawberry cures cholera, morbus, diarrhoea, dysentery, cramps, colic, summer complaint, colic of the mouth and all bowels complaint of children and adults. It is a soothing, effectual and never-failing medicine, which gives immediate relief and speedily works a cure.
